DETAILED ACTION

Election/Restrictions

1. Claims 4-5, 7-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on May 5, 2005.
2. Applicant's election with traverse of the article claims as shown in Figs. 1-4 in the reply filed on May 5, 2005 is acknowledged. The traversal is on the ground(s) that that the method requires the structural features of the article. This is not found persuasive because the article could be used with a different method than recited in claims 7-8.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 3, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Crane (US 648,552).

The patent to Crane shows a fish hook in Figs. 1 and 3 having an elongate shank A at one end and a reversely bent portion C of the shank adjacent the opposite end of the hook member B forming an inner space and a flared open end portion C' for receiving a fishing line D transversely there through and into the inner space.

5. Claims 1, 2, 3, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Fry (US 4,535,562).

The patent to Fry shows in Figs. 4-5 and 7, 9 a fish hook having a shank a hook member 27 at one end. Fry shows a reversely bent portion 9E,11E of the shank adjacent the opposite end of the hook member forming an inner space and having a flared open end portion 17E. Latch 49 substantially closes the space between the flared open end and the adjacent shank portion of the fishhook for retaining a fishing line with the space.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Hewffron, Marks, Bower, Osano, Gottman, Litsey, Halferty, and O'Brien show other fish hooks.
